

PFOS, PFOA, PFCA, PFHXS AND OTHER PFAS MATERIALS CERTIFICATE OF COMPLIANCE

July 10, 2022

Declaration

This is to certify that NVIDIA Networking products comply with the requirements of EU Directive 2006/122/EC (Amendment of the 30th time Council Directive 76/769/EEC) “relating to restrictions on the marketing and use of certain dangerous substances and preparations (perfluorooctane sulfonates).” In addition, the products comply with the requirements of the Commission Regulation (EU) 2021/1297 regarding perfluorocarboxylic acids containing 9 to 14 carbon atoms in the chain (C9-C14 PFCAs), their salts and C9-C14 PFCA related substances and current REACH regulation Annex XIV and XVII.

NVIDIA Networking products do not contain PFOS, PFOA, Linear and branched perfluorocarboxylic acids (C9-C14 PFCAs), including their salts, and C9-C14 PFCA-related substance and perfluorohexane sulfonic acid and its precursor (PFHxS).

However, the photoresist material used by our wafer fabrication CM may contain PFOS in critical processes of wafer manufacturing. After wafer manufacturing, a wafer cleaning process is applied which removes any residual PFOS. The usage of PFOS in photoresists or anti-reflective coating for the photolithography process is exempt by EU Directive 2006/122/EC. Furthermore, all our component vendors supply us with PFOS, PFOA, PFCA and PFHxS free items. As such, NVIDIA Networking final products do not contain any.

Important Note: This certificate of compliance is provided by NVIDIA based on information provided by third parties. This information is accurate to the best of NVIDIA’s knowledge.

A handwritten signature in blue ink, appearing to read "Isabella Schneider".
